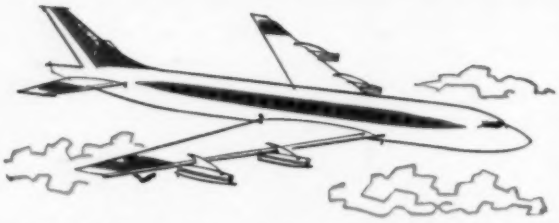
LUNAR PROBE NO. 2

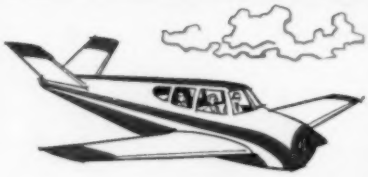
BUYERS' GUIDE FOR 1959

Section D

Convair Cuts Marking Time... Proves High Durability... Low Cost of "Scotchcal" Film on Supersonic Jet Aircraft



Colorful Emblems and markings of "Scotchcal" Film provide long-life identification—decoration for commercial and private aircraft. Using silk screen printing and special process inks, multi-color designs are created with low initial . . . low application cost and unbelievably long life!



Mark Your Aircraft for Safety with durable, brilliant Fluorescent "Scotchcal" Film. It's extremely visible and extremely simple to apply—no prime coats, no brushes—goes on just as easily as "Scotchcal" Film.

On Convair F-102A "Delta Dagger" and Convair F-106A "Delta Dart" supersonic, all weather interceptors, new "Scotchcal" Film provides super tough aircraft marking material of unequalled quality.

"Scotchcal" Film, with a pressure-sensitive adhesive, applies so easily and so much faster than painted markings that one manufacturer cut marking time over 100 man hours *per plane*. Once in place, durable "Scotchcal" Film emblems, numerals and instructional markings resist abrasion, scuffing . . . the effects of supersonic speeds and temperature extremes. They're unaffected by oil, chemical, fuel or solvent spillage—will not fade, crack or peel. "Scotchcal" Film has passed severe wind tunnel and emersion tests—is the only material of its kind that is approved by the USAF for use on jet aircraft! Investigate this time, money-saving marking material . . . send coupon below.

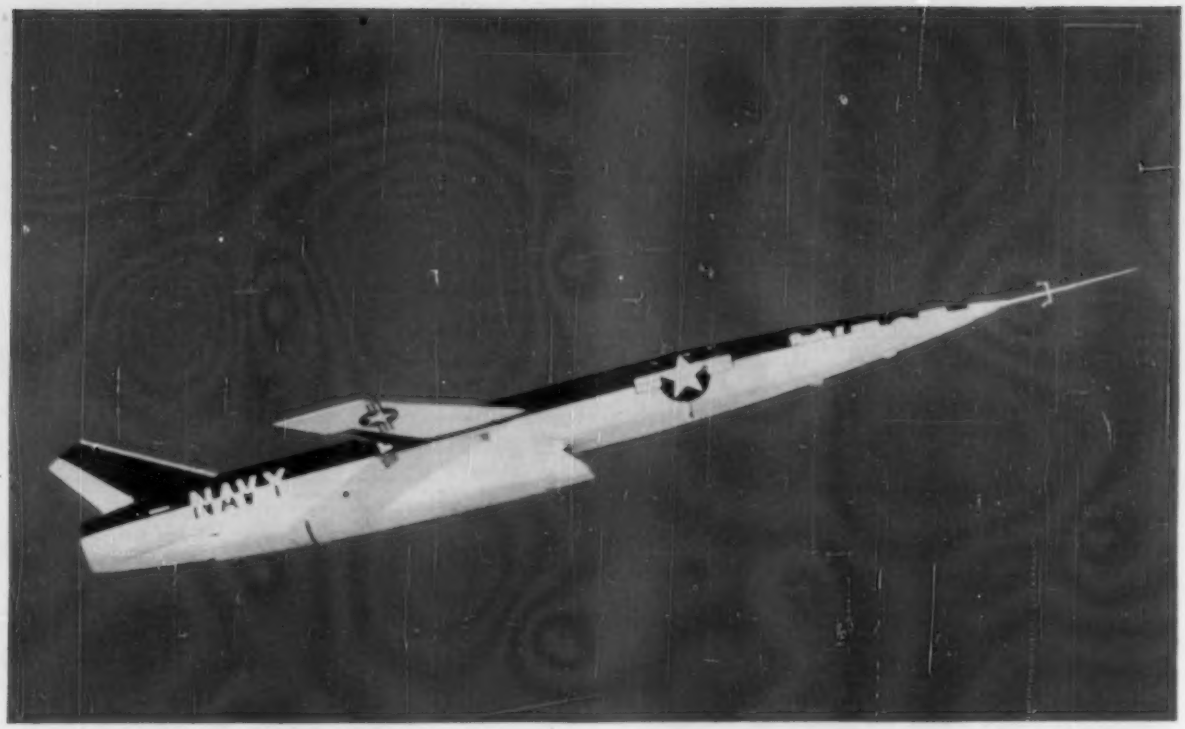
(Continued on page D-190)



Chance Vought Regulus II Missile . . . wired for high temperature and "better than Mach 2" flight with Auto-Lite 350 Wire

AUTO-LITE 350 WIRE
Gives top performance from 400°F. to −80°F.

The Chance Vought Regulus II employs a Machmeter signal to control altitude, calling for climb until cruise level is reached. Service ceiling is listed "over 60,000 feet." High Mach number and altitude requirements make Auto-Lite 350 Silicone-rubber-insulated wire ideal for the job.

Flexible at −80°F., Auto-Lite 350 Wire also has high resistance to flame, abrasion, most missile chemicals, and lubricants. In any installation where extreme temperature demands or chemicals are serious problems, consider Auto-Lite 350 Wire.

Many missile manufacturers find that Auto-Lite 350 Wire also reduces over-all production costs compared with other types of high-temperature wire.

- Flexible at temperatures below −80°F.
- Smokeless
- Resistant to modern aircraft hydraulic fluids, lubricants, and fuels for reciprocating and jet-type engines
- Resistant to most missile propellants
- No discoloration at maximum operating cable temperatures
- Flame-resistant
- Easy printing of circuits with conventional marking machines
- Meets Spec. MIL-W-8777A
- Free stripping
- Manufactured in sizes 22 thru 2/0

For complete information on Auto-Lite Aircraft Wire, including specifications and samples, write to . . .
The Electric Auto-Lite Company, Wire and Cable Division, Port Huron, Michigan or Hazleton, Pennsylvania

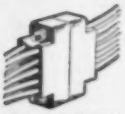
BURNDY

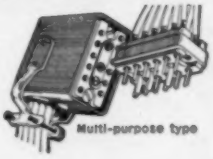
FOR SOLDERLESS RELIABILITY

Connectors
Components
Compression Tooling

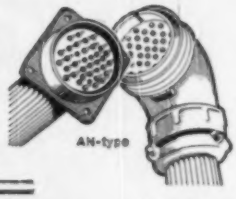
PLUG and RECEPTACLE CONNECTORS



Miniature MS-type

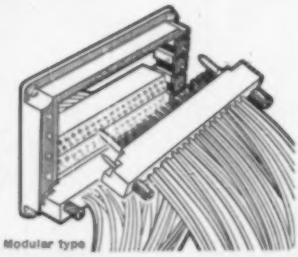


Multi-purpose type



AN-type

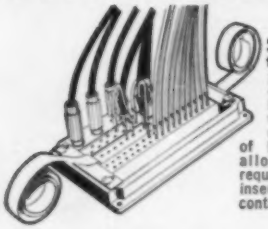
With Crimp-type, Snap-Locked Contacts



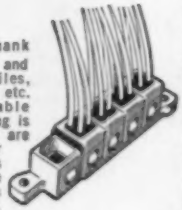
Feed-through, Modular type

HYFEN*—Crimp-type connectors permit the design of lighter, more compact equipment. Contacts can be removed, re-inserted or replaced. Designed to replace, or mate with virtually all existing connectors, the HYFEN meets or exceeds MIL specs. Reliability-tested crimping saves time and ends the high rejection rate inherent with solder.

TAPER PIN PANELS



STAPIN*—Solid shank taper-pin contacts and panels for missiles, control equipment, etc. Especially valuable where circuit testing is required. Contacts are of high-quality copper alloy and plated as required. An impact-type insertion tube installs contacts into the panel.



COMPRESSION SHEATH CONNECTORS

For Shielded or Coaxial Cable

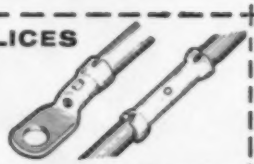
UNIRING*—One-piece connector for grounding, joining or terminating. Inner ring slides under shielded braid while tap wire is held between braid and outer ring. Accommodates single or multiple taps. Available with nylon insulation or uninsulated.

HYRINGs*—Two-piece inner and outer ferrules, color-coded. The small HYRING is slipped under the braided shield and the larger, HYRING is slipped over the shield and ground leads. A single crimp completes the assembly. Outer ferrule available pre-insulated.

TERMINALS, LUGS, SPLICES

INSULUG*—Color-coded, nylon insulated lugs. Also spade or fork-tongue design, or banded for automatic machines.

SEALINK*—Nylon insulated, water-sealed, one-piece splice for single or multi-cable. Anodized aluminum sealing rings. Takes AN 26 thru 10.



HYLUG*& HYLINK*—Compact, one-piece, pure electrolytic copper. Electro-tin plated to prevent corrosion. With or without insulation grip. Inspection holes for simple, check of wire insertion.

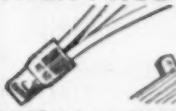
PANELS and DISCONNECTS

UNILOK*—Single or gang disconnect, pressure or non-pressure applications. Seamless, crimp-type, removable contacts with maximum mechanical, electrical efficiency.

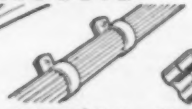
MODULOK*— Terminal block with snap-in, spring-loaded contact and separable modules. Either quick-disconnect or permanent block. 30 modules (2 or 4 tier) per ft.

PANELOK*— Pressure-tight, molded panels with nylon insulated or uninsulated, silver-plated HYPIN* sockets. Connect, disconnect from either side of bulkhead without removing panel.

OTHER PRODUCTS

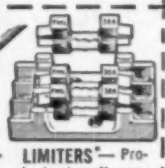


BURCAP*—Nylon-insulated, crimped splice for wide range of wire combinations. Electrolytic copper for maximum conductivity.



NYLOCLIP*—Molded nylon, lightweight, cable hanger. Resists temperatures from −60° to 250°F. 17 sizes for cable, bundles ⅛" to over 2".

FINGRIP*— Inexpensive, reliable quick-disconnect terminals. Male, female, right angle variations. Install with automatic machine or simple hand tools.



LIMITERS*— Protect aircraft systems against high overloads, shorts. Visual or mechanical indicating type. 400 c. 115/208 v AC, DC up to 30 v.

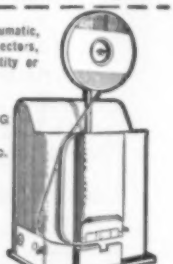
TOOLING

— Over 100 different hand, hydraulic, pneumatic, semi-automatic tools and machines available for installation of connectors, splices, and contacts. Choice usually depends on installation quantity or current assembly methods.

MBND
Depth-of-indent-controlled hand tool

YD series
Cartridge-fed, semi-automatic

Y10NCP
Bench-mounted, foot-operated.



BANDOLUG
Fully-automatic.

BURNDY, world's largest exclusive connector manufacturer, offers more than 10,000 tested and proven connectors. With companion tooling designed to fit any production line, large or small, the BURNDY compression method has solved literally thousands of connector problems for OEM, Electronics, Aircraft/Missile, Marine, and other government agencies. The adjoining coupon will bring you the complete story.

Research Labs Keep Pace With Giant Stride Of America's Air Industry!

CUSTOMER PROBLEM:

Require test rig for measuring full scale aircraft turbine bearings. Test rig must simulate actual operating conditions.

SOLUTION:

N/D engineering, in cooperation with customer under the direction of a defense agency, developed the aircraft turbine bearing testing equipment shown above. The Test Rig Control Console, shown on the left, initiates and controls tests, and completely records *all* operating performance characteristics. The test stand itself, above right, simulates the actual conditions to which the bearings are subjected in flight. It develops radial loads of up to 25,000 lbs. . . . and thrust loads reaching a maximum 75,000 lbs. Bearings up to 110mm bore are tested at speeds as high as 20,000 r.p.m., in temperatures ranging up to 1200° F. Research facilities such as this are your assurance that New Departure stands ready to work closely with you on *your* bearing research problems.

For information on New Departure precision Aircraft and Instrument ball bearings, or research facilities, call the New Departure Sales Engineer in your area or write Dept. G-12..

From research—development—design—fabrication—installation—field services—to final success

SPACE meets the pace... of today's accelerated ground support needs

Mission accomplished:

TITAN erector actuators

BOMARC flight simulators

ATLAS weight and thrust measuring systems

altitude simulation chambers / permanent, semi-portable and mobile test cells / block house instrumentation / missile liquid level propellant detection systems / cabin leakage testers

Name your functional requirements for ground support! Conventional aircraft, turbojets, turboprops, ramjets, missiles or rockets — count on the same SPACE skill to speed the solution to your problems.

Air Start Cart

Significant advance in efficiency, economy, safety:

NEW SPACE UNIVERSAL AIR START CART provides low or high pressure jet engine starting, landing gear and strut servicing — at a fraction of the initial cost, operating and maintenance expense of comparable facilities.

A single compact unit (less than 88" wide), easily stored and transported, its storage capacity is adequate for eight normal engine starts. Air is controlled to 450° and delivered to the engine in uncontaminated condition.

Elimination of blower-type exhausts prevents all possibility of injury caused by burns.

Standard commercial components, capable of withstanding ambient conditions from −65°F to +160°F, are used throughout. Equipped with pneumatic tires and springs, covered by a canopy of heavy gauge metal, this SPACE cart can be truck mounted with compressor driven from power take off, or supplied with either gasoline or electrically driven air compressor.

SPACE FIRE CONTROL UNIT

Now, fire control . . . faster, more efficiently, and at lower cost than with any type of conventional equipment known today! Easily portable, fool-proof in operation, and completely dependable, SPACE Fire Control delivers enormous volumes of dry chemical plus chemical foam at high pressures, when and wherever needed. SPACE Fire Control meets the highest standards set by industrialists and airfield safety experts. And if necessary, this SPACE unit doubles as a pumper with capacity for more than 500 gallons of water a minute.

Available skid, trailer or truck mounted to suit your particular requirements.

ENGINEERS

Logic, skill and vision find a special place with **SPACE**. Write today about the opportunities that may await you. Your letter will receive the personal attention of top management. Address it directly to the Vice President of Industrial Relations, Box 5175, Dallas 22, Texas.

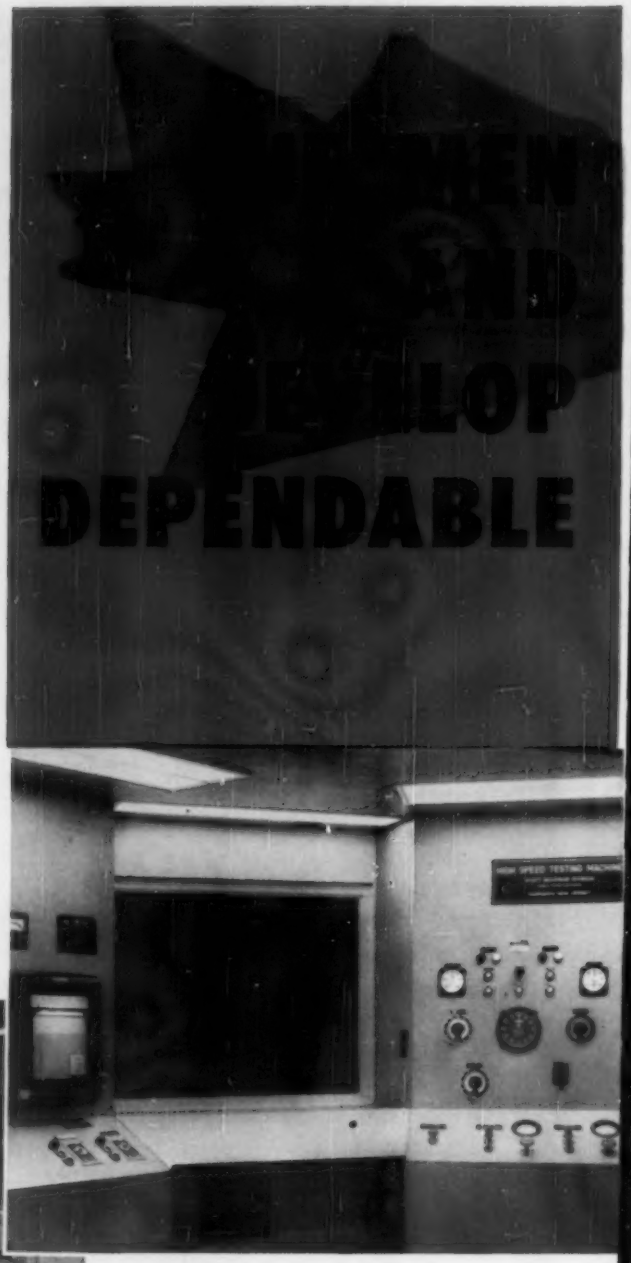
why HYATT is America's NO. 1 SOURCE of jet engine roller bearings:

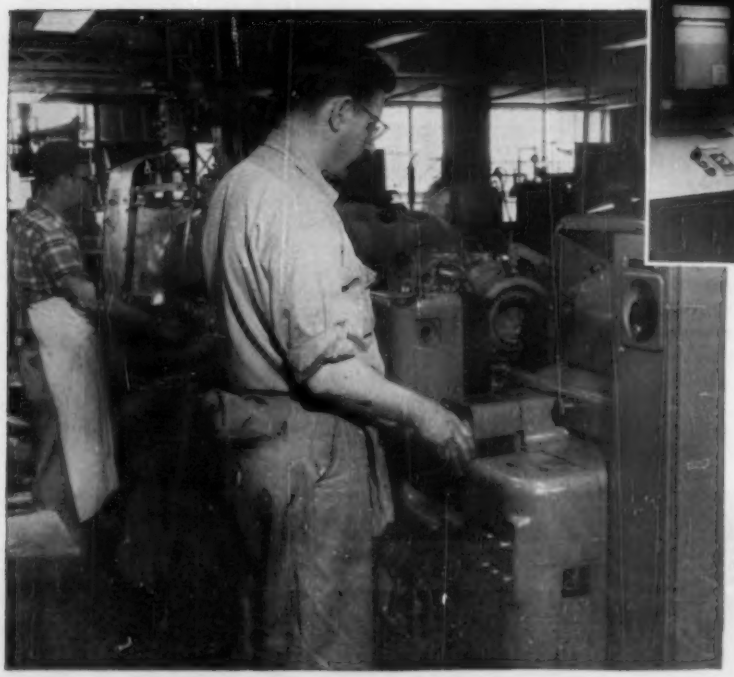
HYATT offers two decisive advantages:

1 Years of experience in cooperating with aircraft engineers to develop solutions to jet-age bearing problems.

2 The skills and facilities to maintain *prototype quality* throughout on-time *quantity production.*

For size ranges and load ratings of standard **HYATT** Aircraft Bearings, request Catalog A-56. For expert engineering and production help in solving special bearing problems, contact Hyatt Bearings Division, General Motors Corporation, Harrison, N. J.





FACILITIES: **This high speed test machine is part of a completely equipped metallurgical laboratory with modern test equipment, for research and development in the fields of Higher Temperatures • Higher Speeds • Heavier Loads in smaller areas, to meet aircraft requirements.**

MEN: **A highly-trained force of expert Metallurgists • Chemists • Designers • Engineers • Technicians • Production Craftsmen**

The "career-curve" of a man named Carter

Charlie Carter started out like a ball of fire. First ten years — terrific! Then he seemed to slow down. Other men — younger newcomers — passed him by. Why?

What happened to Charlie? Nothing. It's what has been happening to industry. Business has become so big and busy, it moves too fast for men who seem satisfied with the status quo. Never have management ranks been so wide open for "get-up-and-go" men.

Look ahead, read ahead, get ahead. Know your job inside out. Be an "authority". But don't stop here. Be a growing man . . . equally knowing on the cross-currents of other job functions within your company — well-informed on the working inter-relationship of all operations — the big picture.

How can you do this comfortably? With the business publication you have in your hand right now. Its editors know your field. They work in it — right at your side. They are your eyes and ears. They go to the places you would go if you had the time. They look, listen, question for you. They review, analyze, edit . . . deliver all that is important to you. They eliminate the non-essential and the time-wasting. They do this fast and accurately. And because they write about that which is as close to you as your own family — your future . . . you will find your favorite McGraw-Hill publication more and more a pleasure as well as a profit to read.

The big benefit to you is simply this: The greater time you put into reading this magazine, the greater your gain in "time saved". You handle your present job faster and with far greater effectiveness. And you reward yourself with bonus hours of new opportunity to look up and do something about that bigger job ahead.

McGRAW-HILL SPECIALIZED PUBLICATIONS

The most interesting reading for the man most interested in moving ahead

Flying into
the Jet Age of
Commercial Aviation

NEW DOUGLAS DC-8 JETLINER

EQUIPPED WITH **MACWHYTE** CONTROL CABLES

Douglas' sleek new DC-8 packs four turbojet engines, cruises at speeds up to 590 MPH . . . and will span the United States in just 4 hours, 37 minutes on *regularly scheduled flights!* These fine aircraft will soon be delivered to major airlines, including Pan American World Airways, who will use them to span the Pacific in 10½ hours and the Atlantic in 6½ hours.

Up to 176 passengers can enjoy the DC-8's comfort and quiet flying "over the weather" in sea-level atmosphere at altitudes up to 23,000 feet. With a wing span of 139'9" and a total length of 150'6", the DC-8 will carry a full payload 5000 miles *non-stop.*

Every inch of the DC-8 has been thoroughly tested, undergoing structural-fatigue punishment simulating over 100 years of air service. And every component was selected to give maximum service.

Macwhyte aircraft cable is an important element in the DC-8's control system.

Macwhyte "Hi-Fatigue®" Aircraft Cable is made in a complete line of sizes and types. Macwhyte "Safe-Lock" Cable terminals of stainless steel are available loose or in complete assemblies ready for installation. Macwhyte Aircraft Cables, Terminals, and Assemblies meet the requirements of aircraft manufacturers, airlines, and military specifications. Aircraft Catalog A-3 free on request.

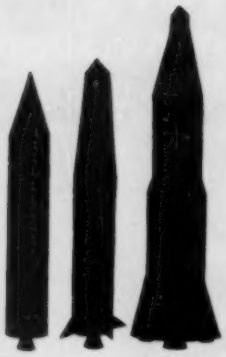
MACWHYTE WIRE ROPE

We build GSE* for the big ones



***Ground Support Equipment—unsung hero of the launching pad**

We have built a substantial part of the Ground Support Equipment for Jupiter, Atlas and Thor—as well as the GSE for our own GAM-77, a new air-to-surface missile for Boeing's B-52. We've designed and built GSE for rocket, ramjet, and turbojet craft for 12 years . . . proved its reliability in thousands of actual test firings.

Consoles, actuators, stands, dollies, platforms, trailers, power supplies, engine servicers, starters, erectors etc., etc. You name it . . . we've built it.

Whether it's a crash program or a long range project . . . single piece of hardware or complete ground support system . . . we'll build it to your prints or do the whole package from R&D through manufacturing.

Also, our experience has taught us how to *organize* as well as execute. We call it systems-management capability. Businesslike. On schedule. It means time and money saved for you.

Write or call: Special Products Manager, Missile Division, 12214 Lakewood Boulevard, Downey, California.

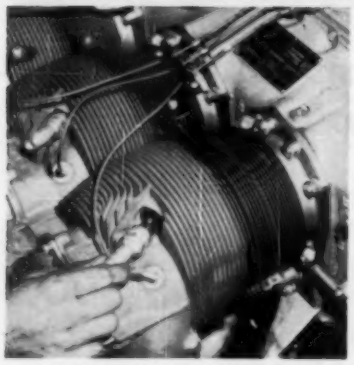
WBAALT* specifies HSR-86**

AC Aircraft Spark Plugs original equipment on NEW Cessna 310 and L-27A Light Twins!



Picture above shows AC type HSR-86 installed in 0470 Continental engine.

*"World's Best All Around Light Twins" sparked by **World's Best Aircraft Spark Plugs!

They took the limit off the sky when Cessna engineered the new 310 and the military version, L-27A. Only the finest materials, components and workmanship go into these "advance design" planes. And, of course, these rigid specifications include factory installation of AC Spark Plugs!

AC Aircraft Spark Plugs give longer service life with fewer unscheduled removals. They heat up fast to burn away fouling combustion deposits as soon as they form. ACs stay clean longer because of the efficient scavenging action. They deliver the high-incendivity spark needed for peak performance and reliability.

In addition to the Light Twins, Cessna specifies AC's S-88 for the entire 180 Series, including the luxurious Skylane! The military L-19 uses the HSR-87 as original equipment.

You'll find AC Aircraft Spark Plugs best for the planes you fly!

Aircraft Care starts with . . .

Engineering aircraft components to meet the needs of modern speeds

More strength and efficiency with less weight . . . that's the story of the ever-increasing demands in today's and tomorrow's aircraft performance requirements.

Through vigorous design research, and constant developments in structural concepts and materials, Rohr engineers are keeping up with . . . and ahead of these demands in the production of aircraft components.

It's another reason for Rohr's position as leader in the design and production of major components for flight.

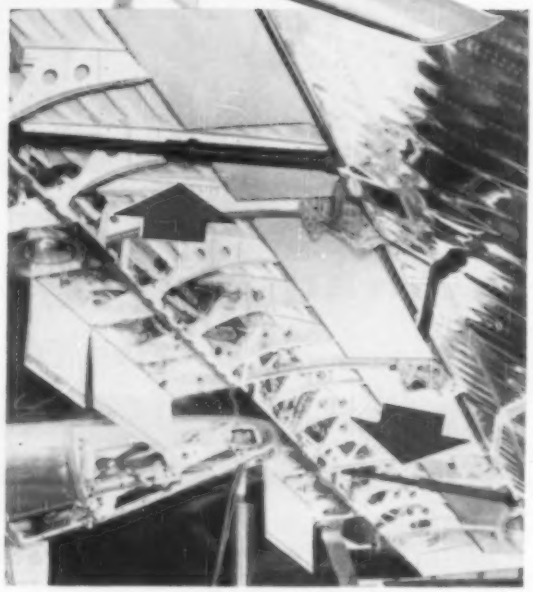
The ELECTRA WING FLAPS

are dependably actuated with less power, weight and space by SAGINAW SCREWS



Custom-ground Saginaw Screw wing flap actuators being installed on Lockheed Electra

6 DECISIVE ADVANTAGES FOR AIRCRAFT AND MISSILE ENGINEERS

1 **POWER SAVINGS.** Operating with over 90% efficiency, Saginaw b/b Screws permit much smaller motors with far less drain on electrical systems, and also simplify circuitry.

2 **SPACE SAVINGS.** Saginaw b/b Screws themselves are compact. They permit smaller motors and gear boxes and eliminate auxiliary equipment required by hydraulics.

3 **DEPENDABLE PERFORMANCE.** Saginaw b/b Screws are far more reliable than hydraulics or pneumatics. Gothic-arch grooves, yoke deflectors and multiple circuits provide added assurance of dependability.

4 **PRECISE POSITIONING.** Saginaw b/b Screws will position components far more precisely than hydraulics or pneumatics; tolerances on position can be held to .0006 in./ft. of travel.

5 **TEMPERATURE TOLERANCE.** Normal operating temperature for Saginaw b/b Screws is from −75°F. to +275°F. But in selected materials, they will function efficiently at temperatures as high as +900°F.

6 **LUBRICATION.** If lubrication fails the Saginaw b/b Screw will still function with remarkable efficiency. Units have been built and qualified for operation without lubrication.

More and more progressive designers are switching to Saginaw Screws to actuate flaps, speed brakes, afterburners, guidance controls and similar critical components with efficiency and precision no other method can equal. *Available from 1½ inches to 40 feet long, 3/16 to 10 inch diameter.* If you are not familiar with the almost limitless possibilities of this remarkable device,

Elevator loads freight into one rocket, while another makes radio-controlled parachute landing. Soon, giant unmanned missiles may carry freight to Europe and South America—in minutes. Thompson Products has the experience and skill to help design and build important components for such radical new spacecraft.

Want to build a freight rocket?

Thompson Products *can help you handle the job*

One of these days, a future-minded manufacturer may launch a rocket freight service, and reap a sky-full of profits.

This company could well turn to Thompson Products for aid in designing and building components for these huge, freight-carrying missiles. Ever since the earliest days of flight, Thompson has displayed remarkable ingenuity in developing advanced new aviation products.

Today, Thompson supplies precision-made parts not only for piston-powered planes, but for all American jets. And Thompson scientists, designers and engineers have now turned their talents to guided missiles.

Thompson has blazed new trails not only in the sky, but on the ground (for the automotive business), *in* the ground (for agriculture), and even *under* the ground (for mining)—not to mention dozens of other industries.

If you're considering the development of an advanced new product, why not call the Thompson people and let them help you get it on the assembly line?

You can count on

Thompson Products

as a partner in solving the design and production problems of an advancing technology

General Offices, Cleveland 17, Ohio

From Thompson's 21 research centers and factories in 18 cities, come, each year, important new advances in mechanics, electronics, hydraulics, pneumatics, aerodynamics, thermodynamics and nucleonics.

TENNEY packages any environment

...and delivers on time!

The most extreme field conditions your product will ever meet — duplicated exactly in a compact, precise Tenney environmental testing chamber custom-built for the job. Starting with one of Tenney's extensively-tested chamber prototypes, the right unit can be engineered in a surprisingly short time. In operation, actual environmental conditions are achieved quickly, maintained efficiently throughout the test run, and accurate data is provided for quick, simple evaluation. For literature describing Tenney's prototype chambers, or for recommendations on specific environmental testing problems, write to Tenney Engineering, the world's largest, most experienced creator of environmental testing equipment.

If you can use custom quality
at commercial prices

-then check on HUDSON...

4-stage service

HUDSON precision quality metal components are produced by cost-reducing mass production methods. The HUDSON production department is equipped with batteries of standard and special presses ranging up to 300 tons. HUDSON performs a wide range of operations to meet your needs.

4 STANDARD PRECISION DRAWN INSTRUMENT CASES

Standardized cases include over 1400 different sizes, with both inside and outside covers, in six standard metals. Hudson offers the engineer a range of closures unequalled in the industry.

3 MIL-T-27A CLOSURES FROM AF TO OA

Cases and covers now offered by HUDSON from types AF to OA inclusive. Immediate shipment from large stock supplies. Cover assemblies to MIL-T specifications also available.

2 SPECIAL FACILITIES FOR TRANSISTOR CLOSURES

HUDSON'S newly installed 10 station automatic presses speed production on your transistor caps. Closures for transistors, diodes and other miniature components to specifications.

1 COMPLETE SERVICE ON MU METAL FABRICATION

HUDSON is now able to supply MU Metal closures in all standard sizes and shapes. Stock supply assures prompt delivery. Consult HUDSON on all your electrical alloy requirements.

HUDSON service is complete... includes sheet metal fabrication, spot welding, heliarc welding and silver soldering. HUDSON designers and production engineers will be happy to help work out your problems.

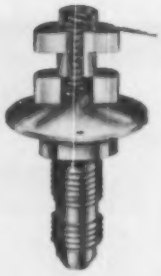
RMC-LINDSAY ONLY GAUGE TO STAND THIS TEST — This photograph shows vibration testing of RMC-Lindsay pressure gauges on the 3200 force pounds Calidyne Vibrator to 50 G output, amplitude .010 to .20. Cycling frequencies to 2,000 cps. The test is conducted so as to parallel actual installation conditions, with gauges subjected to 350°F under operating pressures. Complete test reports are available on request.

THE RMC-LINDSAY GAUGE IS RADICALLY DIFFERENT

from ordinary high pressure gauges

HERE'S WHY...



1. **The RMC-Lindsay gauge is a multiple coil, helical bourdon tube type, *restricted for overpressure.***
2. **The pointer is attached directly to the end of the coil, with no linkages or pivots to be affected by vibration.**
3. **Superior techniques in coiling, heat treatment, calibration, and material specification are *new* and *exclusive* with RMC.**
4. **No other gauge can match RMC-Lindsay specifications:**

PRESSURE RANGE: Pressures in ranges 0 to 1,000 p.s.i. up to 15,000 p.s.i. with retard scales available. OVERLOAD PRESSURE: Nominal overload pressure factor of 2.0 times the maximum dial reading (higher factors available). BURST PRESSURE: Normally 3.0 times the maximum dial reading. TEMPERATURE: Not affected by temperatures up to 350°F. VIBRATION: Qualification test report available on pressure tests showing cycling, vibration, to 2,000 cps. at 25 G's, and resonant frequency vibration tests at 25 G's. SHOCK: Data available on MIL-E-5272 shock test. PULSATION: Practically unaffected by line pulsations of 3% of the full dial reading. ENDURANCE: To 250,000 cycles or higher depending on application. ACCURACY: Hysteresis friction and backlash are below readable limits. Absolute gauge accuracy to extremely low limits as required.

Write to either plant, or contact one of the RMC representatives listed at right.

Motor operated Hot Air Butterfly Valves

Mass Flow Control Valve

Pressure Regulator & Anti-Icing Valve

the answer is right in this family

The featured player on this page is one of the latest additions to Hydro-Aire's family of pneumatic controls: a fast acting (less than a second) D.C. solenoid operated hot air shutoff valve. All dressed up in a precision casting (for low weight), it is ready to handle 250 psig at operating temperatures up to 900 degrees F. Because it is pilot operated, it's easy on current drain, and it can be supplied to fail safe open or closed. Below... some of its distinguished colleagues. If you don't see the one for your requirement, let us know. We're always happy to add to this family.

MEMO TO AIRCRAFT AND MISSILE DESIGNERS:

Call on Tactair for dependable hydraulic and pneumatic components

Does your job include the design or procurement of hydraulic and pneumatic components for aircraft or missile control systems?

If so, it will pay you to investigate the advantages of working with Tactair. Solving the unusual problem, meeting ultra-critical performance specifications, providing precision, high-pressure, high-performance valves of the utmost dependability is our job. To do this requires a rare combination of creative engineering and specialized manufacturing skills. To these must be added precision equipment and long experience with weapons system components. Tactair has all these essentials.

A wide variety of Tactair valves and components are performing essential functions in today's aircraft and missiles. Typical components produced by Tactair include: solenoid selectors, brake controls, master brake cylinders, sequence valves, manual selectors, controllable checks, restrictors and check valves. Tactair has also developed a servo amplifier for the first completely pneumatic autopilot for business aircraft and is the sole producer of a commercial pitot-static tester—a portable laboratory of indicating instruments that makes possible the flightline testing of pitot and static systems in aircraft.

We welcome the opportunity of assisting you with your next precision valve problem. Every job we do is done on a personalized basis; it has been that way for 18 years. Tactair Valve Division, Aircraft Products Company, Bridgeport, Pa., BRoadway 5-1000.

POWER FOR MISSILE & AIRCRAFT HYDRAULIC SYSTEMS

Eastern Aviation Hydraulic Pumps set new standards for performance, yet are the smallest, most lightweight ever made.

By meeting customer requirements and government specifications with precise detail, Eastern Pumps give reliable long-term service.

Hundreds of models, close-coupled to electric motors with speeds to 24,000 RPM, can be furnished for your special systems. You gain the advantage of economical mass-produced components custom-engineered into whatever configuration is needed. Performance is from .015 to 1.5 GPM, 0 to 3000 PSIG, with theoretical displacements from .0021 to .0419 cubic inches per revolution. A variety of bearing combinations handle different types of fluid and operating pressures.

Missile and aircraft system engineers have discovered Eastern Pumps do the same job as units that use greater space and weigh far more. Applications have included circulating coolant in bomber guidance system, providing hydraulic power for ground control of jet, charging accumulator in an in-flight refueling system, furnishing an APU system with power to a missile, and countless others.

For your next project, contact Eastern for creative engineering help that really helps.

Write for NEW Aviation Bulletin 350 describing the above units and larger-capacity pumps.

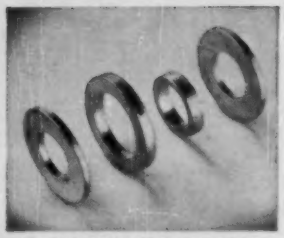
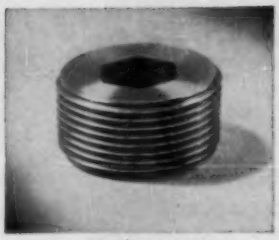
SPS SELF-LOCKING BOLTS WITH NYLOK*

All male-threaded SPS fasteners are available with Nylok self-locking element. Integral nylon pellet assures positive self-locking, eliminates lockwashers, jam nuts, cotter pins, and wiring.



PRELOAD INDICATING WASHERS

PLI washers are more accurate than torque wrenches, assure precisely correct preload. Fastener is tightened properly when compressible inner ring is deformed to same thickness as outer ring. All standard sizes.



SPS PRESSURE PLUGS

Sizes 1/16 through 1¼ ANPT. Specification MIL-F-5509. Heat treated alloy steel, aluminum alloy, or magnesium. Provide a positive seal without compound. Cadmium or zinc plated. Magnesium plugs unplated.

SPS SPECIAL-DESIGN FASTENERS

Above, special high-strength engine bolts offering tensiles up to 240,000 psi. We are equipped to make special screw machine products as well as fasteners from all appropriate metals and alloys, including titanium.

FLEXLOC SELF-LOCKING NUTS

AN-363, 363C, 365. Sizes 4-40 through 1¼-12. Specifications AN-N-10a, 5b, NAS-1021, MS-20365. Cadmium plated steel (to 550°F); corrosion-resistant steel, silver plated (to 800°F); brass and aluminum. Microsizes #0-4.

More reliable fastening for aircraft and missiles

. . . proved in application

hiRf High Reliability factor

At SPS we apply a dynamic standard of quality —continually refined—so that our fasteners will always have the high reliability factor required by today's faster speeds, higher temperatures, and greater dynamic forces.

This emphasis on reliability has resulted in development of fasteners with increasingly higher strength-to-weight ratios, longer fatigue life, and better resistance to the deteriorating effects of heat. Notable examples include SPS Hi Ti bolts—the first successful titanium fasteners for aircraft; EWB-22 bolts—a 220,000 psi replacement for conventional MS 20004 types; and Hi Tm 9 fasteners—a unique bolt and locknut combination providing 170,000 psi at Mach 3-4 skin temperatures.

For complete information on standard or special SPS fasteners, write Aircraft/Missiles Division, STANDARD PRESSED STEEL Co., Jenkintown 3, Pa.

SEL-LOK SPRING PINS

.062 through .500 in. nom. diam. Specifications MS 9047, 9048, and 171401 through 171900. Material Specifications AMS 5506, 5120, 5121. Corrosion-resistant or carbon steel, zinc or cadmium plate. Also beryllium copper.

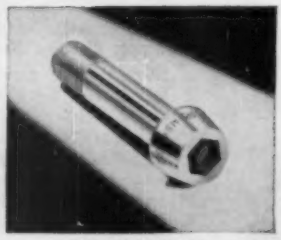
FLEXLOC SELF-LOCKING NUTS, THIN, AN 364

Sizes 6-32 through 1¼-12. Specifications AN-N-5b, NAS-1022, MS-20364. Made of steel, cadmium plated, for service to 550°F. Act as locknuts or stop nuts; lock wherever wrenching stops.

HI-TORQUE 100° FLUSH HEAD SHEAR BOLTS Pat. Nos. 2,677,985; 2,745,120

Sizes 10-32 through ⅝-18. Cadmium plated alloy steel. NAS 498. Also AMS 5735 high-temperature material, 4AL:4Mn and 6AL:4V titanium. Patent recess permits high torquing.



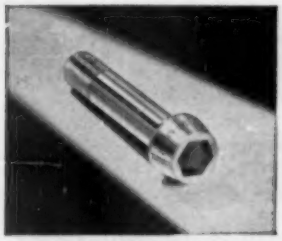
MS 20004 SERIES INTERNAL WRENCHING BOLTS

Sizes ¼-28 through 1½-12. Procurement Specification MIL-B-7838. Alloy steel, heat treated to 160,000-180,000 psi. Head-shank fillets cold worked for greatly increased fatigue life.

SPS HI TI TITANIUM LOCKBOLTS

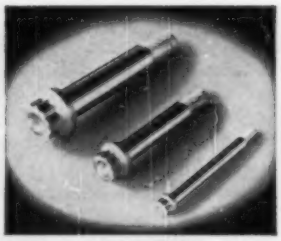
Licensed under the following Huck patents: 2,527,307, 2,531,046, 2,531,049 and 2,754,703

Pull or stump type in variety of grip lengths. Body diameters from 5/16 to 1 in. Protruding or 100° flush head. Help speed production; weigh approx. 43% less than alloy steel counterparts.



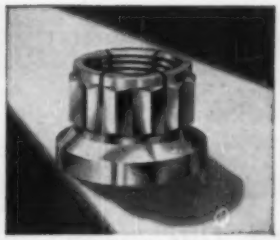
NAS 144 SERIES INTERNAL WRENCHING BOLTS

Sizes ¼-28 through 1½-12. Procurement Specification NAS 159. Made of aircraft alloy steel, heat treated to 160,000-180,000 psi. Threads fully formed by rolling after heat treatment.



NAS 624 SERIES EXTERNAL WRENCHING BOLTS

Sizes ¼-28 through 1½-12. Aircraft alloy steel, heat treated to 180,000 psi. Plated to your specifications. Similar to MS 20004 Series, but offering higher tensile and fatigue values.



FLEXLOC EXTERNAL WRENCHING LOCKNUTS

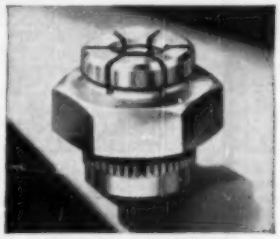
42 FW, sizes ¼-28 through 1½-12. Procurement Specifications NAS 353 and others that apply. Aircraft alloy steel. Serve as locknuts or stop nuts. Approved for temperatures up to 550°F.

SPS HIGH-STRENGTH AIRFRAME FASTENERS

Hi Psi EWB-22 airframe bolts incorporate new configuration, new materials, new heat treat methods, new thread form; provide 220,000 psi. Use with EWN-22 self-locking nuts.

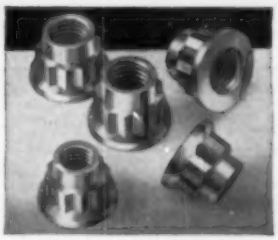
TORQ-SET 100° FLUSH HEAD SHEAR BOLTS Pat. Nos. 494,726; 558,663

Sizes 10-32 through ⅝-18. Cadmium plated alloy steel. NAS 498. Also AMS 5735 high-temperature material, 4AL:4Mn and 6AL:4V titanium. Patented recess permits high torquing.



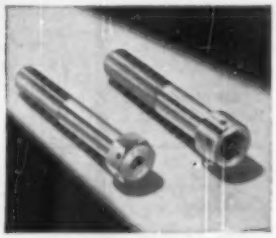
FLEXLOC SELF-LOCKING CLINCH NUTS

Sizes 4-40 through 5/16-24. Cadmium plated steel, rated to 550°F. Also stainless, aluminum and brass. Knurled shank for clinching to thin-section materials. Microsizes 0-80 to 4-48.



FLEXLOC FLW LIGHTWEIGHT, HIGH-STRENGTH LOCKNUTS

Sizes ¼-28 through ½-20. Alloy steel, cadmium plated. Up to 40% lighter than comparable 12-point nuts, yet provide tensile strength (180,000 psi) exceeding MIL-N-25027 minimum.

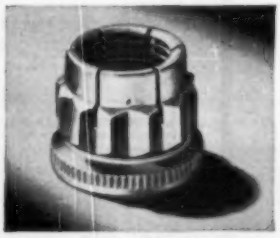


AN STANDARD 6-DIGIT ENGINE BOLTS

All sizes. External hexagon head or internal hexagon socket head types. Made of aircraft alloy steel or corrosion-resistant steel. Supplied with drilled head or with drilled shank.

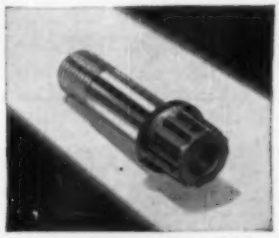
SPS FEATHERWEIGHT LOCKNUTS, FN-12 SERIES

Sizes #4-40 through ⅜-24. Alloy steel, cadmium plated. Specification MIL-N-25027. Up to 72% lighter than comparable locknuts, equal or better strength properties. Rated to 550°F.



FLEXLOC HIGH-TEMPERATURE NUTS

119 FW, sizes 10-32 through ½-20. Corrosion-resistant, stainless steel, silver plated. Withstand temperatures to 1200°F without losing high tensile. Resist galling and seizing.

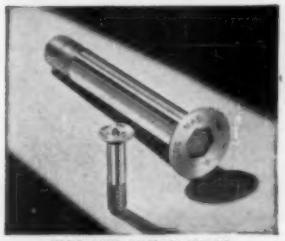


SPS EXTERNAL WRENCHING ENGINE BOLTS

High strength bolts offering tensiles to 220,000 psi. Threads fully formed by rolling after heat treat. Available in all the newer alloys, such as AMS 5735. Also made to MS 9038 Series.

SPS HI TI TITANIUM AIRCRAFT BOLTS

43% lighter than comparable steel bolts, yet have higher strength-to-weight ratio and greater fatigue resistance, save up to 1000 lb. per airframe. Tension or shear configurations.

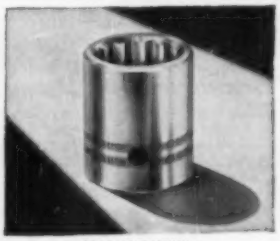


NAS 100° FLUSH HEAD SHEAR BOLTS

Sizes 10-32 through ⅝-18. Procurement Specification NAS 498. Phillips cross recess or internal hexagon head. Cadmium plated alloy steel. Supplied undrilled or with drilled shank.

SPS SLEEV-LOCK BLIND FASTENERS

Sizes 3/16 through ⅛ in. diameter in 1/16 in. grip increments. NAS 1059. Hex head or 100° flush head. Alloy steel, stainless or titanium. Can be removed without drilling and reused.



NAS INTERNAL WRENCHING LOCKNUTS

Sizes ¼-28 through 1¼-12. Procurement Specification AN-N-5, except as noted on NAS 353. Aircraft alloy steel, cadmium plated. Positive locking provided by two nonmetallic plugs.

SPS EWB HI TM 9 HIGH-TEMPERATURE FASTENERS

Provide 170,000 psi tensile at 900°F. Resist deteriorating effects of long exposure to heat. Bolt is made of 5% chrome die steel; nut of AMS 6304 material. Diameters from ¼ to 1½ in.

the PRESSTITE GUIDE to SEALING COMPOUNDS for the AVIATION & MISSILE INDUSTRIES

the MOST COMPLETE LINE of Sealing and Caulking Compounds in America

PRODUCT	RECOMMENDED APPLICATIONS	CHARACTERISTICS
108 Smoothing Compound	To provide efficient aerodynamic smoothness by eliminating surface irregularities. For use on recessed bolt and rivet patterns and along non-flush butt joints. Complies with Specification BMS-5-13B.	Two-component, chemically curing type compound. Curing has excellent adhesion under all weather and temperature extremes. Good flexibility. Excellent resistance to aromatic fuels and oils. Can be sanded to feather edge. Stands high-frequency vibration stresses.
193.1 High Temperature	Used as surface seal on de-icer ducts of aircraft wings. High-temperature pressure seal and gasketing material. Complies with Specification BMS-5-18, Type 11.	Solvent release plus heat cure. Does not become thermoplastic up to 350°F. Does not become brittle at —65°F. Good adhesion to clean metal surfaces after cure. Good resistance to oils, weathering, aromatic fuels, water, and impact.
217.5 Metal Putty	Used as smoothing or fairing compound to fill irregularities in aircraft skin components. Can be used as heat resistant coating. Can be sanded and polished after cure.	Air-drying type cure. Good resistance to water, water vapor, aromatic fuels, hydraulic fuels, bases and acids. Dries rapidly to a tough, resilient mass.
218 Aerodynamic Compound	Structural adhesive on missiles and air frame components. Void or seam filling compound where flexibility is not necessary. Applications where compressive strength at high temperatures is an absolute requisite.	Two-component material, chemically cured without addition of heat. Excellent adhesion to metal, excellent compressive strength at 500°F. Very hard and rigid after cure. Good resistance to milk acids and bases, aromatic solvents and fuels, oils and water.
195.32 Top Coat	Used as protective coating for integral fuel tank sealants. As secondary corrosion resistant coating for inside integral tanks. Complies with Specification MIL-S-4383B.	Air-drying type cure. Excellent resistance to aromatic fuels, oils, water and weather. Good physical resistance to shock, abrasion, heat and cold.
590 Series Oil Resistant Sealer	Used as faying surface seal on metal lap joints. As a sealer for glass and acrylic window enclosures in pressurized areas. Complies with MIL-S-7124, MIL-S-7126, MIL-P-8116, MIL-S-11030B, BMS-5-1.	Non-curing, plastic, available in extruded beads and tapes, and in bulk. Excellent resistance to water, gasoline, aromatic fuels and oils. Flexible at high and low temperatures.
1094 Hole Filling Compound	Used as light weight hole and gap filler in the interior structure of aircraft fuselage. Complies with BMS-5-16.	Two-component, room-temperature curing type. During application, material will not flow or sag from filled hole even in vertical position. Excellent resistance to water, gasoline, aromatic fuels and oils. Flexible at high and low temperatures.
1150 Potting Compound	For use as rigid encapsulating or potting compound where low viscosity characteristics are necessary.	Low viscosity, two-component material which chemically cures at room temperature, easily pours into connectors or encapsulating molds.
1100 Tank Sealant	Pressure Cabin Sealing Compound. Complies with MIL-S-7124.	Two-component, chemically-cured compound which needs no additional heat to set up. Maintains a water-tight, pressure-tight seal when applied to seams of fuselage skins. Excellent fuel resistance, good flexibility under all weather extremes. Non-sag.
1156 Potting Compound	Electrical potting compound for use in electronic connectors and components as a rubber-like dielectric cushion to seal against water, fuels, and foreign particles. Complies with MIL-S-8516B.	Two-component, chemically-cured compound, needs no additional heat to set up. Good adhesion to connector components and wires. Resilient rubber-like cure. High insulation resistance, surface and volume resistivity, and dielectric constant values. Pourable consistency.
1170 Class A Class B Integral Fuel Tank Sealant	For use in integral fuel tanks, for pressure cabin sealing, for window sealing and for access door sealing. Complies with MIL-S-7502B. Class A, ¼, ½, 2, 4. Class B, ¼, ½, 2, 4, 8, 12.	Two-Component, chemical cure. Excellent adhesion to primed and unprimed metal surfaces. Excellent salt water, aromatic fuel resistance. Both brush grade and non-sag gun grade. Excellent flexibility at high and low temperatures. Good tensile strength and elongation.

OVER 400 SEALANTS for Every Sealing Need

Presstite-Keystone produces a comprehensive line of more than 400 sealing and caulking compounds—to meet the specific needs of scores of American industries. New products are being added and existing products improved through a program of continuous research, in order to keep pace with growing needs, revisions or improvements in sealing techniques.

FREE TECHNICAL SERVICE

Our technical facilities and personnel are always at your disposal for consultation, recommendations and suggestions. There's never any cost or obligation for this service. For a quick appraisal of your sealing problem, just tell us the product involved, area of application, problem encountered, characteristics required and, if possible, send us a drawing of your product.

THIOKOL polysulfide type sealants have helped make possible long distance and high altitude flight

For many years, the unique ability of THIOKOL liquid polymers to turn from a free-flowing viscous liquid to a formed-in-place, tough elastomeric seal has played an important role in the progress of aviation.

Back in 1942, sealants based on THIOKOL polymers were used to seal the gas tanks of the then-giant China Clipper . . . permitting storage of the enormous quantity of fuel needed to fly the vast Pacific.

Through the years, their availability has made possible ever-new aircraft design and construction techniques.

Today, virtually every commercial airplane produced goes airborne with several hundred pounds of THIOKOL liquid polymer base sealants in its wings, fuselage and cabins.

Their super adherence to aluminum and other aircraft building materials under normal flight stress . . . their high resistance to ozone, moisture, gasoline, oil and temperature extremes . . . these characteristics suit them ideally to the sealing of fuel tank seams, body seams and joints – both exterior and interior.

As the jet age in commercial flight comes closer . . . introduced by great aircraft like the Boeing 707 Stratoliner . . . THIOKOL liquid polymer base sealants help to enlarge man's mastery of time and distance.

America's most complete line of arc-welding equipment and electrodes...

AC Welders

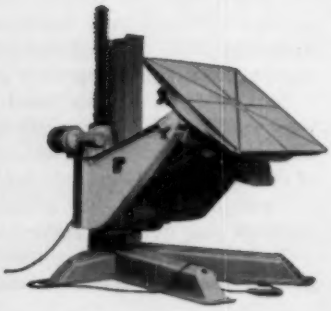
Available in full range of sizes up to 680 amps. All connectable to 230 or 460 volts . . . special voltages on request. Dial-lectric Remote Control gives you any heat you want . . . right at the work.

AC-DC Welders

AC or DC welding current at the flip of a switch! Dial-lectric Control for instantaneous heat selection. Available with high frequency, spot gun, and gas and water controls.

DC Rectifier Welder

Four sizes . . . 200, 300, 400 and 500 amps. No bearings, brushes, commutator, etc. . . . no moving coils. Fingertip Dial-lectric heat control. Automatic open-circuit voltage.



Welding Positioners

For faster, economical down-hand welding. Standard models have 360° rotation, 135° tilt, and power elevation, enabling largest weldments to be handled with ease. Capacities from 100 to 100,000 lbs.

Welding Electrodes

Whatever the job, there is a P&H Electrode to give you cleaner, sounder welds at lower cost: Iron Powder, Low Hydrogen, mild steel, alloy steel, stainless, and Hard Surfacing.

Get Bruning's GUIDE TO RELIABILITY

Design function carries full responsibility for reliability of ALL components of the system . . .

Engineers with hydraulic design functions are meeting this responsibility by specifying hydraulic, pneumatic and fuel system components from Bruning's new catalog.

It's a good guide to reliability

QUICK DISCONNECT COUPLERS

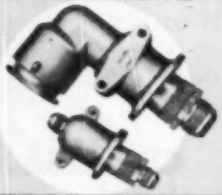
Self-sealing and open flow for aircraft, automotive, industrial and ordnance applications. Special series for liquid oxygen and remote actuation applications.

FUEL SYSTEM COMPONENTS

Educated valves, relief valves, check valves, drain valves, fueling couplers, jettison couplers, launching couplers, automatic "separation" couplers, remote actuation couplers. Components for both conventional and exotic fuels including liquid oxygen.

CYLINDERS

Hydraulic and pneumatic for aircraft, automotive, industrial and ordnance applications. ⅜" to 4" bores—working pressure in excess of 3000 p.s.i.



CUSTOMER SPECIALS

Design • Development • Production

Comprehensive experimental and test facilities are maintained to develop and evaluate new designs, new ideas and new processes. These facilities are available to our customers as required.

CHECK VALVES

Broad range of AN and commercial types — All popular fitting configurations. Full check or "restrictor" check. Special series for "zero" leakage applications.

Liquefied Oxygen, Nitrogen, Argon Containers

- Stationary or Portable Types—30 To 5000 Gallons
- Self-contained Automatic Control Systems
- Fully Enclosed—Requires No External Power
- Deliver Liquid or Gaseous Vapor
- Vacuum Insulation
- Fabricated To Code—ICC Approved For Safety
- Standard Fittings—Valved and Gauged
- Qualified Engineering Assistance Available At Your Request

30 and 50 gallon portables for operational and research laboratory uses.

In-plant facility for production runs of aluminum missile propellant tanks.

S.S.WHITE FLEXIBLE SHAFTS AND ACCESSORIES FOR AIRCRAFT

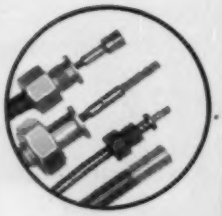
S.S.White Flexible Shafts and Accessories for aircraft have been developed in close collaboration with aircraft industry . . . tested . . . proved in use. They are the ideal solution to critical weight, space and performance problems in military, commercial and private planes.

ENGINEERING SERVICE—The experienced aid of our engineering staff is always available to answer any questions and help you work out application problems. Just write us. No obligation . . . and all information you submit is held in strictest confidence.

S.S.White INDUSTRIAL DIVISION

First Name in Flexible Shafts & Accessories for Aircraft

Dept. D, 10 East 40th Street, New York 16, New York
Western Office: 1839 West Pico Blvd., Los Angeles 6, Calif.



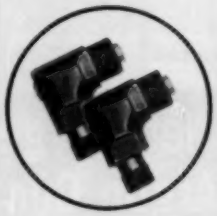
FLEXIBLE SHAFTS

• The simplest, most economical way to transmit power drive or remote control to instruments or parts, REGARDLESS OF LOCATION OR OBSTACLES!

• A complete range of sizes supplied complete, ready to install, ready to go to work for you!

• Only one part...for easier installation, easier servicing, lower production and maintenance costs!

WRITE FOR BULLETIN 5601

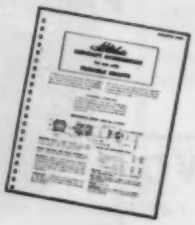


ANGLES ADAPTERS

• Where space limitations prevent a direct connection, S.S.White Angle Adapters make it easy to attach flexible shafts to parts.

• Available in 90°, 135° and straight styles for remote control or power-drive applications.

WRITE FOR BULLETIN 5403

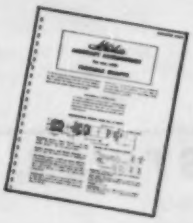


PRESSURE BULKHEAD FITTINGS

• To assure an effective air seal when flexible shaft controls pass through bulkheads of pressurized cabins.

• Low operating torque, lightweight, maintain excellent pressure tightness.

WRITE FOR BULLETIN 5403



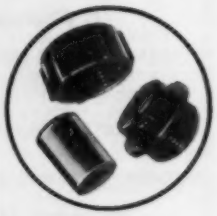
MECHANICAL SCREW JACKS

• For use with flexible shafts or direct motor drive.

• Provide safe operating axial load of 390 lbs.

• Precision made, lightweight, minimum end shake.

WRITE FOR BULLETIN 5403



easy to apply, easy to remove

PROTECTIVE PLASTIC PLUGS AND CAPS

• Protect openings and studs against damage, dirt, dampness, loss of lubricants.

• Two lines to choose from — THE QUALITY LINE of Rigid Acetate (tough, rigid, impervious to petroleum-base oils and greases); and THE ECONOMY LINE Elastoplastic Vinylite (same advantages at lower cost). WILL NOT SHRED, GIVE FULL PROTECTION!

• Available with N.P.T., Machine Screw or Metric threads . . . or plain unthreaded.

GD60 AND 80 SERIES

GD100 SERIES

GD700 SERIES

Control gases safely, accurately

to 15,000 psi and 200,000 scfh with VICTOR REGULATORS

You get precise regulation of high pressure gases with large flow rates, because Victor employs gas pressure to control the regulating diaphragm. The result is accurate delivery from 5 to 15,000 psi with inlet pressures to 15,000 psi . . . plus ability to obtain flows in excess of 200,000 scfh at maximum inlet and outlet pressures. Chart below shows operating range of standard models.

MODEL NO.	MAX. INLET PSI	MAX. OUTLET PSI	FEATURES	MAX. FLOW SCFH
GD10	3,600	500	Single adjustment regulator control	15,000
GD30	2,500	2,500	Load & bleed valve control	25,000
GD31	3,600	3,600	Load & bleed valve control	36,000
GD61C	2,500	2,500	Load & bleed valve control	10,000
GD62C	3,600	3,600	Load & bleed valve control	12,000
GD65	6,000	6,000	Load & bleed valve control	15,000
GD65C	7,000	7,000	Load & bleed valve control	15,000
GD80A	5,000	5,000	Load & bleed valve control	30,000
GD81A	10,000	10,000	Load & bleed valve control	50,000
GD86R	10,000	10,000	For remote control only	75,000
GD100R	6,000	6,000	For remote control only	240,000
GD100	6,000	6,000	Load & bleed valve control	240,000
GD700	7,000	7,000	Single adjustment regulator control; self relieving	15,000
SR10	3,600	1,000	Small, spring loaded regulator	200
LR20B	7,000	7,000	Spring loaded regulator; self relieving	120

Operating temperature range: −67°F. to +250°F.

. . . Yours for the asking
Take advantage of Victor's long experience with high pressure gas regulation to help solve your special problems involving flow rates, delivery pressures, corrosive fluids and temperature compensation. Write, wire or phone us today. No obligation.

All models listed are field proved. Most are designed for panel mounting or remote control. They regulate all non-corrosive gases, including oxygen. Stainless steel models available for corrosive gases and pressures above 10,000 psi. For complete specifications, write for Victor High Pressure Regulator sheets.

GROUND SUPPORT EQUIPMENT

AND TEAMWORK

GSE

It takes the teamwork of a complex group of organizations, devoting thousands of manhours of effort, to solve the problems of ground support. But teamwork implies "know-how" — capability in problem solving — on the part of each unit contributing to the group effort.

Weatherhead capability is founded in a history of successful development and production of hydraulic and fluid system components. Such experience is hard to come by, especially with the accelerated complexities of the missile age, where "teamwork" becomes the other side of "know-how."

If you're in GSE or missile design, development or manufacture, call Weatherhead for teamwork . . . today!

3 ways to design flexibility into tension ducting systems

Arrowhead has concentrated on the development of all three types of stainless steel flexible bellows units. Each design has been refined to its ultimate in efficiency for its size and weight. Compare all three. They are Arrowhead's answers to your problems of flexibility in a tension ducting system.

Compare all these factors

PRODUCT	TIE-ROD	GIMBAL JOINT	PIN JOINT
TENSION MEMBER	Struts and linkage	Gimbal ring	Side pin hinge
ENVELOPE SIZE	Smallest	Largest	Medium
WEIGHT	Low	Heavier	Low
PRESSURE DROP	Approx. 7x△P St. Tube	Approx. 3x△P St. Tube	Approx. 2½x△P St. Tube
FLEXIBILITY	Angular movement in all directions.	Angular movement in all directions.	Movement in one plane only. Absorbs load on axis perpendicular to deflection.
DEFLECTION FORCE	Lowest	Low	Low

The relationships above will vary with combined factors of temperature, pressure and size.
A fourth tension device – Arrowhead braided bellows – was not compared because of the wide variation in its characteristics according to its length.

Arrowhead tie-rods, gimbal joints and pin joints are available in all aircraft ducting sizes. Designed to meet the most stringent aircraft requirements.

Write for complete information and technical data.

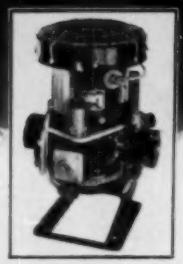
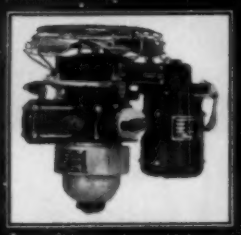
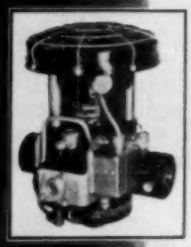
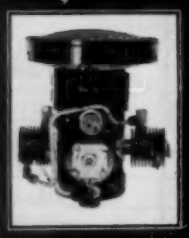
Cornelius

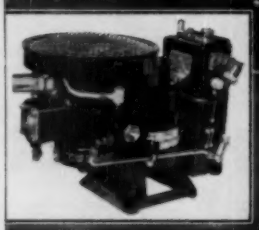
world's most popular airborne compressors . . .

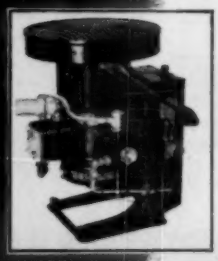












It's no mere coincidence that Cornelius has manufactured more airborne compressors than all other makes combined – in fact, of all aircraft carrying compressors, 98% use Cornelius.

Engineers who specify them tell us the reason is clear: *Cornelius compressors have what it takes – efficiency-wise and performance-wise.* Model for model, they are the smallest, lightest and coolest running of any made. Cornelius compressors give you a choice of hydraulic, AC, DC, or engine drive. Some models weigh only 9 pounds *complete with motor.* They will deliver from 0.5 to 10 SCFM at pressures up to 3000 PSI, through a full range of altitudes and temperatures. 5000 PSI models are also available for special applications.

For complete information consult a Cornelius catalog or discuss your requirements with a Cornelius Sales Engineer. He has the experience and information that will save you time and money.

THE Cornelius COMPANY

554 – 39th Avenue N. E. • Minneapolis 21, Minnesota

Pumps
Extremely high horsepower-to-weight ratio combined with exceptionally high efficiency.

Surge Valves
Designed to prevent sudden pressure surges to eliminate shock.

AIRBORNE HYDRAULICS

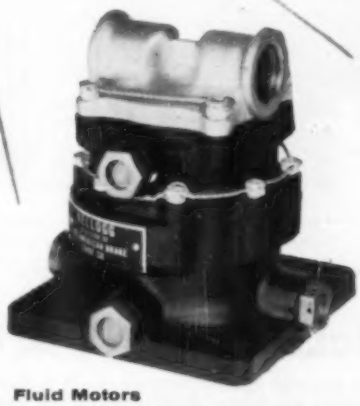
pumps . . . fluid motors . . . systems

A complete line of hydraulic pumps and motors ranging from 0.06 to 1.77 cubic inches per revolution (c.i.p.r.) with variable or constant delivery.

These compact and lightweight hydraulic components have been developed from the basic designs provided by the Denison Engineering Division of the American Brake Shoe Company and are built to meet today's demands for high performance.

General range: 0.6 to 1.77 c.i.p.r., —65° to 450° F., to 4000 psi, to 12,000 rpm. Individual designs for special requirements.

For information on hydraulic components or complete hydraulic systems, contact our engineering representatives, Airsupply Company or Aero Engineering Company, Divisions of The Garrett Corporation, with offices in major cities.



Fluid Motors
Reversible, capable of high speeds and temperatures.

Helicop-Hut* Communication Stations in Flight.

Flight test of AN/MRC-60 Radio Set in S-144 Shelter.

Here's mobility for any system!

Craig designs and builds lightweight, high strength, all-weather shelters and components for all types of communication, navigation, and missile support systems to military specifications.

Craig leadership in this highly specialized field is reflected in such developments as Craig's exclusive aluminum and poured-in-place foam plastic shelter construction, with its excellent insulation properties . . . in lightweight aluminum telescoping antenna masts . . . and in many other advances . . . all of which assure you of maximum systems mobility with minimum weight and bulk.

And Craig's experience and engineering capability ties the package together — gives you complete system integration.

Write today for information on any of these products or services:

CRAIG PRODUCTS: Shelters • Trailer Vans • Antenna Masts • Transit Cases • Spare Parts Cabinets

CRAIG SERVICES: Complete system layout and installation • Shock Isolation • Air Conditioning • Heating • System test and checkout

50 to 10,000 Gallon Capacities

hofman

LIQUID OXYGEN and NITROGEN UNITS

For In-Plant Storage and Transportation

Model 48-500 Liquid Oxygen — Nitrogen Unit

These low-loss storage and transport units are skid, caster, wheel and trailer mounted and are available in capacities to 3500 gallons. Larger vessels for bulk liquid storage are sized to 10,000 gallon capacities. All units feature standard equipment as follows: bottom fill and discharge line, top fill line, liquid level gauge, vacuum valve and filter, thermocouple vacuum gauge, pressure gauge, A.S.M.E. code stamped inner vessels, quick pressure build-up system, extended stem valves on liquid lines, ending with Hofman quick couplings.

QUALIFICATION TEST REPORT BY AEROTEST LABS: VITAL STEP TOWARD RELIABILITY AND ACCEPTANCE

In today's highly technical and competitive aeronautical equipment business, a certified qualification test report from Aerotest Laboratories serves many important purposes. It proves that your product meets all specification requirements. It is evidence that your designers have achieved built-in reliability. And it adds a mighty big gun to your sales ammunition, because all leading contractors and Government agencies recognize Aerotest as a leading independent source for reliable, impartial testing of aircraft, missile and spacecraft equipment. **Aerotest is an approved prime contractor to the U.S. Navy and Air Force. Complete, modern facilities and creative test engineering for all functional and environmental tests on electronic, mechanical, pneumatic, hydraulic and avionic equipment.**

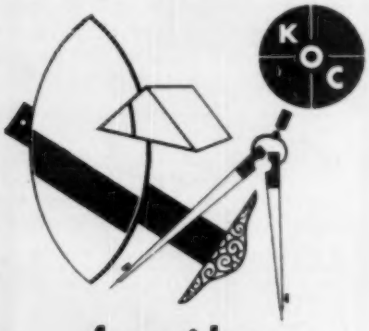
LOW TEMPERATURE	HUMIDITY	RAIN	ACCELERATED CORROSION
HIGH TEMPERATURE	SALT SPRAY	SUNSHINE	RADIO INTERFERENCE
HOT FUEL FLOW	IMMERSION	ENDURANCE	CONTAMINATED FUEL
HIGH ALTITUDE	SHOCK	EXPLOSION	FUEL RESISTANCE
SAND AND DUST	ACCELERATION	FUNGUS	ENVIRONMENTAL VIBRATION

Plus — High pressure flow testing of equipment with rocket and missile fuels and oxidizers.

Complete test program proposals submitted without obligation. Aerotest Laboratories, Inc. 129-11 18th Avenue, College Point 56, N.Y.

For the full story on Aerotest's facilities and services, send for free illustrated brochure.

Aerotest



from ideas to instruments

The sum total of the skills involved in the conception, design, development and manufacture of complete optical systems frequently cuts across many fields. Kollmorgen combines technical skill and complete facilities for highly precise work in optics, mechanics and electronics. These combined skills can help you solve your viewing, testing and inspection problems. For literature, write to Department 20D.

DESIGNED FOR PRECISION PERFORMANCE

SIMMONS PACITRON LIQUID QUANTITY MEASUREMENT AND MANAGEMENT SYSTEMS feature the latest technological improvements. Provide accurate gaging of fuel, oil, liquid oxygen and other conductive and non-conductive liquids, as well as many fuel and liquid management functions. Pacitron is currently utilized to control *center of gravity* within desired limits and to transmit voltage signals for telemetering purposes. Can be adapted to many additional functions which require control within specified limits.

SIMMONDS LIQUID LEVEL SENSING SYSTEMS provide accu-level indication of hydrocarbon and synthetic liquid fuels, aqua ammonia, LOX, liquid nitrogen, anhydrous ammonia and other liquids. Can be used to operate a warning light or to actuate pumps and valves to transfer liquid at specified levels. System is rugged, has no tubes or moving parts.

SIMMONDS SU FUEL INJECTION SYSTEMS, the only advanced type of fuel injection system in production for gasoline engines. Offers improved fuel economy and fuel distribution; better starting, idling, acceleration and deceleration; improved cold starts; eliminates icing problems. Ideal for aircraft and drone engine applications.

SIMMONDS PUSH-PULL CONTROLS are positive, precise and rugged. Simple to install and easy to inspect; require negligible maintenance. Capable of handling heavy loads under extreme vibration and temperature conditions. Variety of sizes and weights available with a wide selection of end fittings and attachments.

SIMMONDS FLUSH-FITTING LATCHES are flush-fitting on either flat or curved surfaces. General purpose latches for skin mounting or high strength latches for structural mounting. Wide selection of housings and fittings are available. Ideal for securing precision equipment, access panels, nose cones and missile sections.

SIMMONDS BEACONRY is designed to meet the urgent need for greater reliability in missile location and recovery equipment. Beacon transmits continual signal to permit location and homing. Advantages include increased reliability, greater range, longer operating life.

Buckeye's

COMPLETE LINE OF REFUELING EQUIPMENT FOR . . .

OVERWING REFUELING

No. 9162 high capacity nozzle features easy opening, soft closing, minimum shock, during refueling operations. Also No. 8385 Non-Drip oil nozzle for delivering lube oil. Features sure shut-off, non-drip valve in end of tube.

No. 9162 Overwing Nozzle

UNDERWING REFUELING

No. 4092 valve is easily connected to aircraft fueling adapters. Makes a positive, leakproof connection. Basic mechanism designed to deliver 600 g.p.m. at pressure drop of 8 PSI through valve and adapter. Several different models available.

No. 4092 Underwing Nozzle

HYDRANT SYSTEMS

No. 13200 Emergency Shut-off valve can be remotely controlled. Adapter poppet valve and emergency shut-off valve work independently of each other.

Also No. 4096 series standard hydrant adapters; No. 4093 series hydrant coupling valves.

No. 13200 Hydrant Emergency Valve

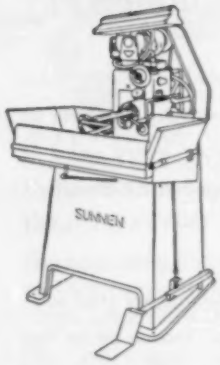
SUNNEN HONING

ADDS ULTIMATE-PRECISION TO GUIDED MISSILE PARTS



SEND FOR FIVE HONING BOOKLETS — CHECK READER SERVICE CARD

SUNNEN® PRODUCTS COMPANY
HONING

7920-Y Manchester Ave. • St. Louis 17, Mo.
Canadian Factory: Chatham, Ontario

If you're producing control valves, power packs or servo-mechanisms for guided missiles . . .

. . . you need equipment that will hold ultra-precision tolerances and controlled surface finishes on both internal and external diameters.

More and more manufacturers of control systems have specified SUNNEN HONING because it gives them the ultimate in accuracy at lowest capital and operating cost.

SUNNEN HONING assures leak-proof controls with instant, friction-free responses under extreme temperature variations. It will hold tolerances as close as .000020"—with surface finish to 2 micro-inches if desired.

Our field engineers will gladly demonstrate this ultra-precision process on your parts . . . in your plant. Or, we'll work out your problem in our customer honing service department. Why not write us for more information?

STANPAT SOLVES THE GHOSTING PROBLEM

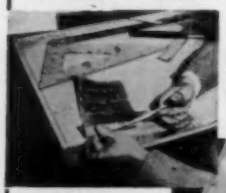
NEW resin-base STANPAT ELIMINATES GHOSTING,
offers better adhesion qualities on specific drafting papers!

THE PROBLEM
Some of our longtime customers first called our attention to the "ghosting" problem. Certain tracing papers contain an oil which could be leached out by the STANPAT adhesive (green back) causing a ghost.

THE SOLUTION
A new STANPAT was developed (red back), utilizing a resin base which did not disturb the oils and eliminates the ghost. However, for many specific drafting papers where there is no ghosting problem, the original (green back) STANPAT is still preferred.

WHICH ONE IS BEST FOR YOU?
Send samples of your drawing paper and we will help you specify. Remember, STANPAT is the remarkable tri-acetate pre-printed with your standard and repetitive blueprint items—designed to save you hundreds of hours of expensive drafting time.

SO SIMPLE TO USE



1. PEEL the tri-acetate adhesive from its backing.

2. PLACE the tri-acetate in position on the tracing.

3. PRESS into position, will not wrinkle or come off.

STANPAT CO.
WHITESTONE 57, N. Y., Dept. 77
Phone: FLushing 9-1693-1611

STANPAT CO. Whitestone 57, N. Y. U. S. A.

☐ Enclosed are samples of the drafting paper(s) I use (identify manufacturer). Please specify whether Rubber Base or Resin Base STANPAT is most compatible with these samples.

☐ Send literature and samples of STANPAT.

☐ Please quote price on our enclosed sketches which we are considering to have pre-printed.

Heli-Coil stainless steel Screw-LOCK Insert is easily wound into tapped hole in aluminum housing. Spring tension of the locking coil retains the screw securely, meets military specifications for locking torque and vibration.

How Carrier Corporation Saves 40% in weight • 30% in assembly time ...with *HELI-COIL*® SCREW-LOCK* INSERTS

... and assures maximum performance of threaded connections in the refrigeration system for air conditioning the giant Douglas DC-8 jetliner.

In assembling aluminum alloy compressor castings, Carrier engineers needed reliable threaded connections that could resist the heat and vibration encountered at 600 mph. They selected ***Heli-Coil's*** one-piece, *internal locking* Screw-LOCK Insert.

The results: design simplified, boss areas minimized, weight reduced as much as 40%, lock nuts and lock wiring eliminated. Now one man assembles the entire unit in 30% less time than before ... and danger of thread failure has ended!

It's a typical example of why manufacturers in every field are turning to precision formed, stainless steel ***Heli-Coil*** Screw-LOCK Inserts to meet torque and vibration specs ... to protect threads against wear, stripping, galling and corrosion ... to save costs, space and weight.

ULTRASONIC IMMERSION TESTING ...

an essential inspection tool in aviation industry

In engine and airframe manufacture where parts are irregular in contour, Sperry Ultrasonic Immersion Testing is the ideal inspection technique. Sperry Ultrasonic Immersion Testing systems not only locate internal flaws accurately and with the greatest reliability, but also result in great savings in material and inspection time. *One Sperry tape-programmed automatic installation is estimated to have cut inspection time by more than 80% at a large jet rotor plant.*

Based on the Ultrasonic Reflectoscope, equipment ranges from simple manually operated instruments to completely automated tape-programmed devices. Immersion tanks are made by Sperry in several standard sizes or are custom-built to your specifications.

Sperry Ultrasonic Immersion Testing can save you time and money ... write today for details.

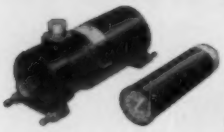
Finest in breathing regulators—from mask mounted through pressure suit and capsule controllers, global survival kits and emergency equipment to support man in the high performance air vehicle.

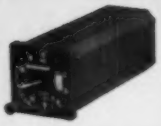
FUEL FLOW SYSTEMS



Pioneer vane type fuel flow systems, long the standard of the industry, have now been augmented by new, true mass flow systems of unexcelled accuracy and flexibility as required for jet aircraft and missile applications.

FLIGHT INSTRUMENTS

Pioneer accuracy and dependability are exemplified in the complete line of Airspeed, Mach-Airspeed, Vertical Velocity and Turn and Slip Indicators, Accelerometers as well as Altimeters, both compensated and stand-by.



MISSILE COMPONENTS

Pioneer-Central's cryogenic and instrument design and production experience is now being utilized in the production of cryogenic valves, pressure sensing probes and liquid level sensors for advanced missile systems.

ULTRASONIC CLEANING SYSTEMS

Pioneer in the application of ultrasonics to the volume cleaning of parts and assemblies, Pioneer-Central is the first to offer a fully integrated, cabinetized type of ultrasonic cleaning system.

JOY ELECTRICAL CONNECTIONS for AIRBORNE & SUPPORTING GROUND EQUIPMENT!

For more than a generation, JOY has been closely associated with the external electrical power connecting requirements of the Aviation Industry. Beginning with jumper and receptacle sets developed to connect auxiliary starting power *to the old China Clippers* . . . JOY'S line of electrical connectors for the highly specialized needs of air-borne equipment now covers all standard, and many non-standard, external electrical power connecting requirements. Dimensionally and electrically JOY connectors conform to A.N. and M.S. standards — and MIL specs. . . . however, when the need arises, and conditions permit deviations, JOY is equipped to provide them quickly and economically. Why be satisfied with less . . . *take a tip from the thumbs-up salute of America's leading technicians* . . . demand the best — JOY connectors!

- *available for extreme temperatures*
- *distortion proof and wear resistant*
- *watertight and moisture resistant*
- *oil, acid, flame and ozone resistant*
- *supplied in many styles and sizes*

. . . and little affected by the abuses of man, nature or working conditions.

CD 158.2 **FREE BULLETIN B65. Ask us for your copy!**

Aviation's Favorite Electrical Plugs & Receptacles . . . Since 1935

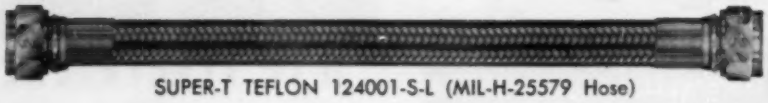
AIRCRAFT

FLEXIBLE FLUID LINES

Specify STRATOFLEX

STRATOFLEX hose fittings and complete hose assemblies, in a wide range of sizes and types, allow engineers exceptional freedom in equipment design. Stratoflex flexible hose and fittings are available for most fluid applications and for a wide range of pressures. New Super-T Teflon* is designed for extreme temperature applications.

Write for Aircraft Catalog or for new S-3 Bulletin describing Super-T Teflon.



SUPER-T TEFLON 124001-S-L (MIL-H-25579 Hose)

113026-S-L

Thinner wall construction, lighter weight wire braid make Stratoflex "113" Hose up to 40% lighter than conventional MIL-H-8794.
